

# REACHING MALI

CAM has gone from one to six churches in the past year and a half.

- Base in Bamako, planted Nov 2004
- Dio church joined us in March 2007
- One planted in Sotoly in May 2007
- One planted in Goro in May 2007
- One planted in Bamabougou in Nov 2007
- One planted in Diago in May 2008

Our goal is to plant a strong base church in every one of the eight regions in Mali. That base church then

takes responsibility to expand God's kingdom into their whole region by planting churches in every village by means of movies, preaching, signs, miracles and wonders.

On our base we will raise up and train church planters to go out and expand God's kingdom.

Over the past 1+ year we have seen hundreds of people healed and saved. Praise God!

May God's glory cover all of Mali!

## WHAT CAN YOU DO?

### Pray & Write

Prayer keeps us going. Emails encourage.

### Come Help

We desperately need workers, whatever you can do, whether you speak French or not.

### Sponsor A Child

You can sponsor a child for \$60 a month, providing meals, clothes, medical care, and tuition for school.

### Give Monthly

We need monthly supporters to help us meet our budget. We are \$3600 short every month.

# STREET CHILDREN

The capital of Bamako has thousands of street children whose existence the government denies. Every Muslim family gives one boy away to a Muslim teacher - often when they are only 5 years old - where they have to memorize the Quran at night, and beg for money during the day. They don't get food and get beaten frequently. Many of the boys run away from their teachers fighting to survive on the streets. Every night we pick them up at the bus station and take them home for a meal, and a safe place to spend the night.

Once a week we have a special program, where they not only get a meal, but have fun, hear the gospel, receive prayer, medical attention and clothes when needed.

Those who want to get off the streets and live for Jesus, are taken in as our own children.

We have 8 children now, and as soon as we have more space and workers, more will follow.
